PERRY & ROBINSON'S

ELEVENTH ANNUAL

# Seed Catalogue.

OUR PREMIUM FLAT DUTCH.

41 & 43 WARREN AND 13 E. FAYETTE STS.

SYRACUSE, N. Y.

SYRACUSE, N. Y.:  
MASTERS & STONE, PRINTERS AND BOOKBINDERS.

—1881.—

FREINDS:—

We are now prepared to pay you our annual visit, and hope as many of our friends as have found it profitable, "with all their acquaintances," will return our call either in person or upon paper. It is with gratitude we greet you this year. From the very many flattering reports we have received, and the few complaints we have heard, we are confident our seeds gave general satisfaction, and we place the past year's business upon record as the most satisfactory since our organization.

We are obliged to report a scarcity in some of the leading varieties of seeds. Onion seed, Celery, Salsify, Egyptian Beet and nearly every variety of Peas are short, and you may look for higher prices before the season is over. We advise our customers to buy early in order to secure reliable seed at present prices. We reserve the right to change prices according to market without notice to customers, but in all cases will try to please you and supply seed at their value.

We have a stock of extra fine Sweet Corn, Mangle Wurzel and Sugar Beet seed, Little Gem and Advancer Peas, and our favorite improved Brunswick Cabbage, &c. We hope a careful perusal of our little catalogue will prove a pleasure to you and a profit to us both. Thanking you for past favors we are

Very Respectfully Yours,

PERRY & ROBINSON.

## *Seeds by Mail.*

To any part of the United States, at one cent per ounce, or any fractional part thereof.

The maximum weight of packages which may be sent through the mails at this rate is limited to four pounds.

Seeds by mail to Canada, one cent per ounce, in packages of not over one pound.

None of our customers need go without any seeds desired, as we send by mail, post paid, any small parcels of seeds ordered. Any person, not a customer, can be supplied by sending the money with their orders. Small sums can be remitted in postage stamps as change.

### Number of Plants produced from one Ounce of Seed as follows:

	PLANTS.		PLANTS.
Asparagus.....	about 500	Kale.....	about 2,000
Broccoli.....	" 2,000	Leek.....	" 1,000
Cabbage.....	" 2,000	Lettuce.....	" 3,000
Cauliflower.....	" 2,000	Pepper.....	" 2,000
Celery.....	" 3,000	Tomato.....	" 3,000
Egg Plant.....	" 1,000	Sage.....	" 1,000
Endive.....	" 3,000	Thyme.....	" 5,000

### Number of Plants to the Acre at the following distances apart:

Distance Apart.	No. of Plants to the Acre.	Distance Apart.	No. of Plants to the Acre
1 ft. by 1 ft. ....	43,560	6 ft. by 6 ft. ....	1,210
1½ " 1½ " .....	19,360	8 " 8 " .....	680
2 " 1 " .....	21,780	9 " 9 " .....	537
2 " 2 " .....	10,890	10 " 10 " .....	435
2½ " 2½ " .....	6,969	12 " 12 " .....	302

---

FOR A LAWN.—Meadow Fescue, 8 lbs.; Crested Dogstail, 5 lbs.; Perennial Rye, 8 lbs.; Kentucky Blue, 6 lbs.; Red Top, 8 lbs.; Sweet Vernal, 2 lbs.; White Clover, 4 lbs.

PERMANENT PASTURE.—Kentucky Blue Grass, 4 lbs.; Orchard Grass, 5 lbs. Meadow Fescue, 6 lbs.; Crested Dogstail, 2 lbs.; Red Top, 5 lbs.; Italian Rye, 5 lbs.; Timothy, 5 lbs.; Medium Clover, 3 lbs.; White Clover, 2 lbs.

MEADOW OR WHAT IS CALLED GRASS LAND.—Timothy, 10 lbs.; Red Top, 3 lbs.; Perennial Rye, 4 lbs.; Italian Rye, 5 lbs.; Alsike Clover, 5 lbs.; SOW ORCHARD GRASS with Small Clover; it ripens at the same time.

SOW TIMOTHY with Large Clover.

We recommend Kentucky Blue Grass for Pasture. Farmers do not use enough of it in this State.

---

**Orders by Mail Promptly Attended to.**

## THE ARNAUTKA SPRING WHEAT

Has proven a Superior Variety in every particular. The past season was very unfavorable for spring grain but as far as we can learn the yield was from seven to ten bushels per acre more than the China Tea in the same lots. W. H. Gage & Co. of Fulton, purchased largely of the Arnautka last fall, and inform us that it is an A No. 1 flouring wheat. We make this statement because parties who are not acquainted with it have tried to belittle its flouring qualities.

## RUSSIAN WHITE OATS.

We have the following from E. H. Adams, Skaneateles, N. Y.:

"I sowed 7½ bushels of Russian White Oats on five acres of old sod. They yielded 264 bushels of good oats. They stood up well and had a good, stiff growth of straw, but would have yielded better if 2 or 2½ bushels had been sown to the acre as they were very thin on the ground. I consider them a good variety and will sow 20 acres next spring."

Alfred Rose of Penn Yan, says from one ounce of seed which he planted in rows 14 inches apart and 5 to 7 inches apart in the row, one kernel in a place, he raised 157 lbs. From each kernel planted there was 15 to 25 heads and many 30 to 40 heads from one kernel; and many heads 18 to 22 inches long containing 300 to 350 kernels in each head. The product from one kernel was 6 ounces.

G. W. Hicks, Alexander, N. Y., says of the Russian White Oats:

"They yielded about double, with probsters and straw stiff, free from rust, while other oats rusted. Would say that they are the handsomest oats growing I ever saw. I would recommend them to any one as I know them to be boss."

ARNAUTKA.

Morey Gifford, Marrietta, N. Y., says of the Russian White Oats: "I sowed three acres for Mr. Cuddeback, he furnished seed. I was to give him all I got over 40 bushels per acre. About one acre was entirely destroyed by worms. I have 120 bushels for myself and about 75 bushels for Mr C. You cannot recommend them too highly, they will do all that is claimed for them."

# FLOWER SEED.

## Special Cultural Directions.

Referring to the letters in the fourth column of the Flower Seed List.

**A.** Sow for succession from April to June, for Summer and Autumn blooming. Prepare the ground by thoroughly digging, adding a good supply of leaf-mould or well-rotted manure, making the surface fine and smooth. Sow thinly, lightly covering.

**B.** Sow in gentle heat, in a well-drained pot or pan of light soil. Sow thinly and cover lightly with a fine, sandy soil. Shade from bright sunshine, and water, when necessary, through a fine rose watering-pot. Transplant to open ground, when all danger of frost is over. The seed may also be sown in a cold frame in April, for open border in the latter part of May, but will not flower so early. Transplant or thin out before the plants get too large.

**C.** Sow from April to June, or in August, in a well prepared bed of light soil, covering the seed lightly. Keep clear of weeds, and thin out the plants, if too thick, sufficiently early to fairly allow them to develop their growth.

**D.** Sow in Spring in a well-drained pot or well-prepared hot-bed, of light, peaty, sandy soil. Place in a moderately warm temperature, shade from bright sunshine and keep moist, transplanting when ground is in proper condition, or in open ground, after May 10th, for late flowers.

**E.** Sow in open border in April or May, and thin out or transplant, giving each plant plenty of room.

**F.** Sow any season, in a pot prepared as follows: let the pot be one-third full of drainage or broken charcoal; over that rough sittings of mould and the surface with very fine soil, half of which should be composed of fine sharp sand; water with a fine sprinkler; scatter the seed thickly over the surface, covering very lightly; keep from the direct rays of the sun. As soon as the plants show the third leaf, transplant into seed-pans, three-fourths of an inch apart, giving a little air to strengthen them. When the plants begin to touch each other, they should be transplanted singly into small pots and keep them in a cool, airy part of the greenhouse, near the glass. Re-pot when necessary.

We are Agents for the following Implements and will furnish them to Farmers at Manufacturer's prices.

## SEYMOUR'S NEW AND IMPROVED PLASTER SOWER.

*✓* This Machine will sow Guano, Bone Dust, Plaster, Ashes, Salt, Lime and all fertilizers; any quantity per acre, as desired, at the rate of from 25 to 30 acres per day. *It is not designed to sow grain.*

*✓* It will sow them as well when *very damp* as when dry, and the quantity per acre can be easily regulated.

*✓* Coals in Wood-Ashes and all lumpy substances, not harder than charcoal, are readily crushed or ground while sowing.

*✓* Wet ashes from the leach tub, Hen Manure, &c., can be sown in the most perfect manner.

*✓* The Machine is perfectly simple, easily managed by the most inexperienced person, and is strong and very durable.

*✓* No expense is spared in making the Machine just as it should be.

*✓* It sows a breadth of 8 ft. and weighs 325 pounds.

*✓* They have been in use for the past ten years, and *not one of them* has failed to give entire satisfaction to the purchaser.

*✓* The Machine is furnished with **Thills or Pole.**

*✓* It has no Cog-wheel gearing, and is well and beautifully painted, ornamented and striped.

*✓* Each Machine, *fully warranted.*

*✓* For \$10 A GRASS SEEDER IS ADDED so that CLOVER and TIMOTHY SEED may be sown at the same time as the Fertilizers.

## MATTHEWS' GARDEN SEED DRILL.

Improved for the

Season of 1881.

### THE BEST GARDEN DRILL IN USE.

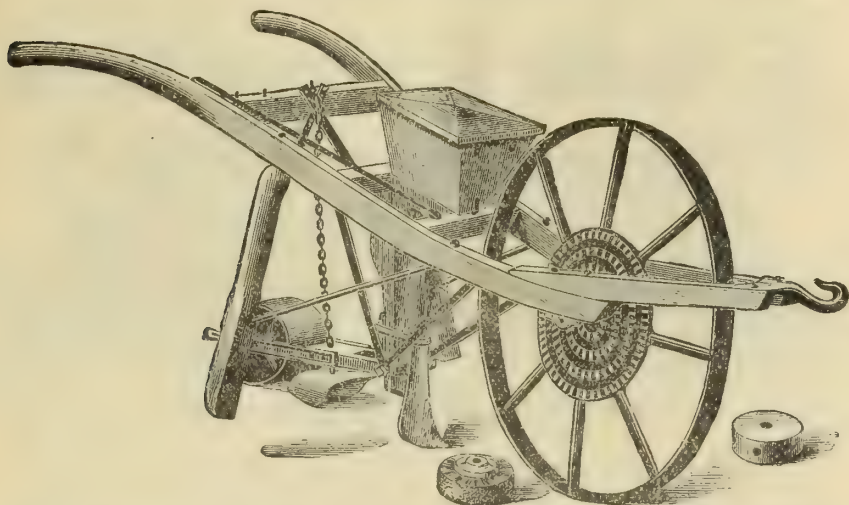

Messrs. D. LANDREDTH & SONS, Philadelphia, Pa.

"We have sold the Matthews' Garden Seed Drills for several years, and they have given more general satisfaction to our customers than any Drills we have ever sold. We have one at Bloomdale that has passed over about one hundred acres in a single season."

G. C. FREEMAN, Esq., Plainfield, N. H.

"The Matthews' Garden Seed Drill gives perfect satisfaction. It does all it is recommended to do. I have used it with different kinds of seeds and find it works just right. It is a sure thing every time."

## Albany Corn and Seed Planters.

Awarded the highest Medal at the Centennial as being the best Planter.

THIS PLANTER, at ONE PROCESS, OPENS ITS furrow, GAUGES, DROPS, COVERS the Seeds, and Rolls them down. ALSO MEASURES and MARKS OFF the distance for the next row or DRILL to be planted.

IT WILL PLANT ALL KINDS OF SEEDS, from Corn, Beans, Peas, etc., to the smallest and varied form of Garden Seeds, in HILLS or DRILLS, at ANY DISTANCE BETWEEN THE SEEDS or HILLS, from ONE inch to SEVENTY-TWO inches. ALSO MEASURES the QUANTITY of SEEDS to the HILL, DRILL or ACRE.

Any of these changes may be MADE IN FIVE MINUTES' TIME to adapt it to the work required, and the SEEDING ACTION MAY BE INSTANTLY THROWN OUT OF GEAR AND STOPPED, in turning at headlands, or for moving from field to field, by being careful about throwing out of and in gear at the end of the rows. The hills may be made to row both ways. It may be worked by horse or hand.

SAVES ITS COST IN PLANTING FIFTEEN ACRES OF CORN. One man and a horse can plant from seven to ten acres of corn in a day, with the Planter, at a cost of from \$3.50 to \$5.00.

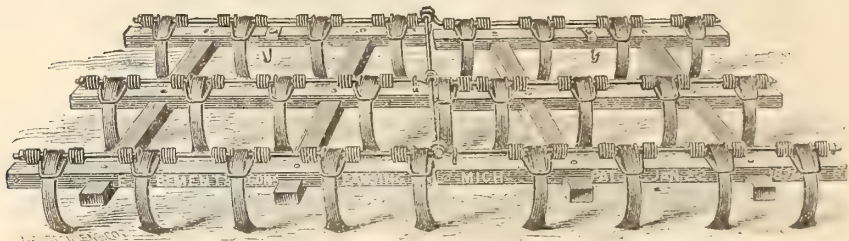

### COST TO PLANT FIFTEEN ACRES BY HAND.

Marking both ways, one man and horse, three days at \$3.....	\$ 9 00
Planting, twelve men at \$1.....	12 00
Board for ten extra men, two meals each, at 25 cents.....	5 00
Wasted one bushel of Corn.....	1 00

Price, Combined Planter and Horse Hoe - -	23 00
With Horse Hoe and Fertilizer, - -	25 00

*We also sell the Albany Dog and Sheep Power for Churning, &c.*

# The Lansing Spring-tooth Harrow.

**PRICE \$30.00.**

*THOUSANDS SOLD ANNUALLY.*

We have only space for brief mention, see testimonials.

HART, Mich., Nov. 28, 1879.

E. BEMENT & SONS:—I have used the Kalamazoo Spring-tooth Harrow, the Lansing Spring-tooth Harrow, and although the Kalamazoo Harrow is a splendid tool, I think the Lansing Spring-tooth Harrow is better adapted for all kinds of work.

P. A. HUBBARD & SON.

HART, Mich., Dec. 23, 1879.

E. BEMENT & SONS:—To your inquiry of how I like the Lansing Spring-tooth Harrow, I would say I have used it on my farm for two seasons, and I consider it the greatest improvement of the age. I can do three times as much as with the common harrow.

M. A. LUTHER.

JONESVILLE, Dec. 3, 1879.

E. BEMENT & SONS:—In reply to your inquiry, permit me to say that I am highly pleased with the Spring-tooth Harrow bought of you. It does its work thoroughly, fully equalling the work of two Scotch harrows, such as I had used, and its draft is very light, considering the work performed. One advantage over any other spring-tooth harrow which I ever saw is that the teeth, working independently, do not jump the frame as do those where the tooth is rigidly fixed, on rough or stumpy land, and thus greatly favors the team. I cordially indorse it as the best harrow I ever used.

O. PALMER.

# THE IRON TURBINE WIND ENGINE

Manufactured by  
**MAST, FOOS & CO.**

THE superior points of the Iron Turbine are easily comprehended. The entire machine is made of iron. The Wheel and Vanes are made of No. 24 Sheet Iron, well bound and braced with the best quality of wrought bar iron, and so well put together that it is impossible for the wind to tear it to pieces or injure it in any way. The wheel being constructed on the Turbine principle causes it to give more power than any other wheel of the same diameter in the market, and as there is no wood about it to swell, shrink, rattle and be torn to pieces by the wind, it is certainly much more durable. It weighs no more than the ordinary wood wheel, hence there can be no objection on that score. No. 2, Diameter, 10 feet; for wells to 100 feet deep; will pump water for 200 head of stock. Shipping weight 450 pounds.

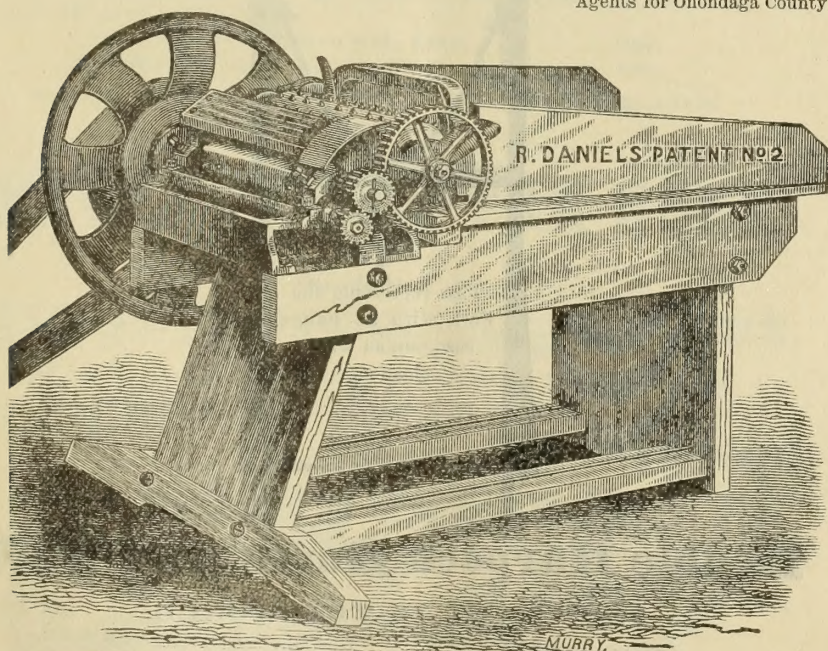

**PRICE AT FACTORY \$85.00**

We have in stock the No. 2 Mill, also a small Model, in perfect running order.

Parties in want of *Wind Power* will do well to call and examine the Iron Turbine before purchasing. We will furnish full description, with cost of building Derrick, &c., including Pumps, if desired.

**PERRY & ROBINSON,**

Agents for Onondaga County.

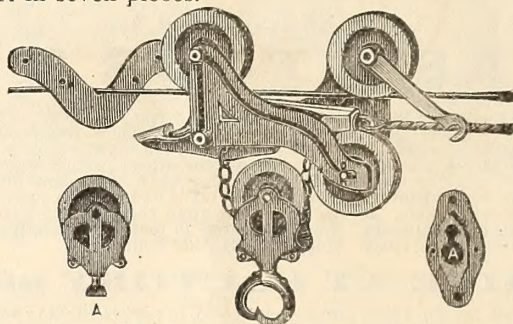

No. 2 Fodder Cutter, 16 in h Knives. Price, \$60.00.

**THE BEST IN USE.**

# C. S. KERSHAW'S NOVELTY HAY ELEVATOR.

This Elevator can be placed on the track or removed without drawing any bolts or moving the wheels, by using movable arms, while all others are taken apart in seven pieces.

This represents the  
Fork with its Fangs  
cast out, as when  
loaded.

## Double Harpoon Horse Hay Fork

THE BEST IN THE WORLD.

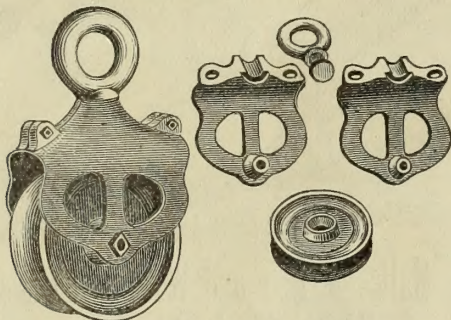

*1009 Sold by us in Four Years.*

**PERRY & ROBINSON, Syracuse, N. Y.**

# THE CHILLED HAY FORK PULLEY.

(Patented July 10th, 1877.)

The above represents the parts of **SCOVILL'S PATENT CHILLED HAY FORK PULLEYS**. You will notice the wheels run on cone bearings of Chilled Iron, and not on the bolt as in the case of common iron pulleys, also that any part of these Pulleys can be supplied at any time, if desired.

We have sold these Pulleys three years, and consider them the most economical of any for farmers to use. We have two sizes.

**Five inch, or Common size, Price - - - 40c.**

**Eight inch, or Large size, Price - - - 80c.**

**A LIBERAL DISCOUNT TO THE TRADE.**

## PEACE FOR THE HENS.

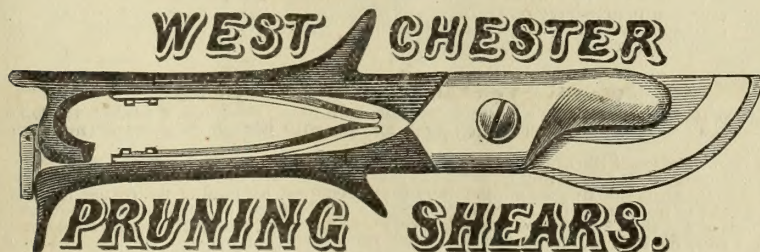

### *Use The Medicated Nest Eggs*

To drive away all Insects, Hen Lice, &c. One of these Eggs used in a nest where a hen is sitting is sure to relieve the hen from any of these pests. They are as hard as stone, make the very best Nest Eggs, and are warranted to do all that is claimed for them.

**Price each, 5 Cents. Per Dozen, 50 Cents. Per Gross, \$4.00.**

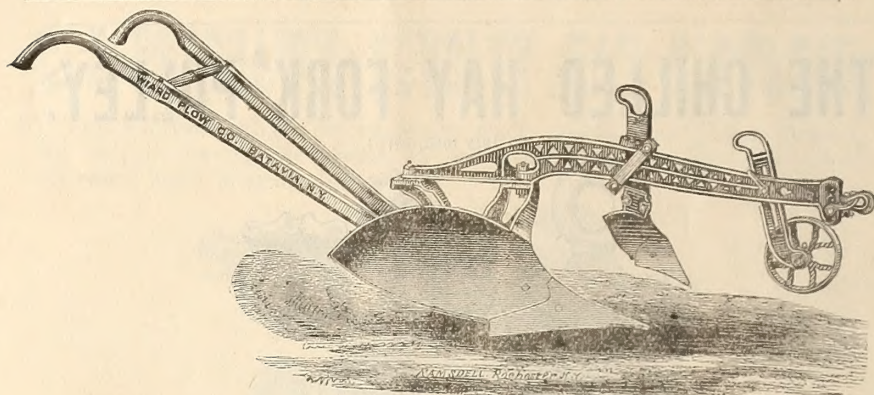

Put up in half-gross and gross boxes. At wholesale or retail. Address

**WEST CHESTER**

**PRUNING SHEARS.**

## Wiard's Patent Malleable Iron and Wood Beam Chilled Plows

[NEW 1880 SERIES]

Are offered to the Farmers of the country for the coming season with many valuable improvements.

**THE WIARD** is the strongest and most durable Plow in the market.

**THE WIARD** is the best for general purpose work, in both sod and stubble.

**THE WIARD** has the simplest and most complete adjustment for using two or three horses abreast.

**THE WIARD** is the best Plow extant for hard clay and stony ground.

**THE WIARD** rivals all other chilled Plows for cleaning in loose and adhesive soils.

**THE WIARD** cannot be excelled for Lightness of Draft.

**Our Malleable Iron Beam** is the only practical adjustable metal Beam made; is guaranteed against bending or breaking; is perfectly adjustable for 2 or 3 horses; over 20,000 in use, and not one in a thousand failed.

**Our Jointers, Wheels and Handles** are all adjustable.

**Our Chilled Moldboards** excel all others for fineness and uniformity.

**Our Plows** are warranted to any reasonable extent.

If you are going to buy a new Plow, be sure to give the **WIARD** a trial.

If there is no Agent for the **WIARD** in your vicinity, address.

**THE WIARD PLOW CO.**

*We do not send Plows on commission!*

**BATAVIA, N. Y.**

## BUY A FREDERICK'S PATENT EQUALIZER.

**NOW NOTE A FEW FACTS.**

All who have tried the experiment know they can plow as much ground with two plows drawn by three horses each as you can with three plows drawn by two horses each, because the load is lighter, they move more steadily; they come out at the end of the season less worn.

You will have saved one hand in labor and one plow. You can use horses of uneven strength. You often want to work a colt or weak horse against a strong one. This equalizer adapts itself exactly to the strength of the horse.

### COMPARE FACTS WITH FIGURES.

Common Double-Tree costs.....	\$3 00
Common Two-Horse Stretcher costs.....	3 00
Common Three-Horse Equalizer costs.....	5 00

**\$11 00**

**We Give You for \$4.50 in One Article,**

A perfect common Double-Tree, a perfect common Two-Horse Stretcher, a perfect Triple-tree for use without Tongue, a perfect Triple-Tree for use with Tongue, a perfect Three-Horse Stretcher.

You know how cruel the drawing of a reaper or mower is with two horses. Even where there is no side draft, the wobbling from side to side of the tongue distresses the toughest horse. You can see that this side to side motion is entirely removed by pulling the reaper from two points instead of from one point, as with two horses. Three horses can cut one-fifth more grain without changing, than four horses working two abreast. They are easily managed and don't lag. You can, by its use, prevent your horses from becoming balky. The broken harness caused in getting out of mud-holes will supply every farmer in the State with our Equalizer.
